

The listing of the claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claim 1 (Currently Amended): An illuminable information unit for technical apparatus or machines, in particular for fittings for vehicles, ~~characterised in that~~ wherein visible display elements (4) of the information unit consist of at least one light-scattering plastic element (4), with which transparent scatter bodies (18) are embedded into a transparent plastic mass (4).

Claim 2 (Currently Amended): An illuminable information unit according to claim 1 ~~or 2, characterised in that~~ wherein the transparent plastic mass (4) and/or the transparent scatter bodies (18) is/are transparently coloured.

Claim 3 (Currently Amended): An illuminable information unit according to claim 1, ~~characterised in that~~ wherein the transparent plastic mass (4) is selected from the group of polycarbonates and/or from the group of flame-proof and/or high-temperature-resistant polycarbonates.

Claim 4 (Currently Amended): An illuminable information unit according to ~~one of the preceding claims~~ claim 1, ~~characterised in~~

~~that~~ wherein the light-scattering plastic element (4) is provided with a cover layer (5), wherein the cover layer (5) comprises recesses (6) which may be produced preferably by way of laser processing.

Claim 5 (Currently Amended): An illuminable information unit according to ~~one of the preceding claims~~ claim 1, ~~characterised in that~~ wherein parts of the light-scattering plastic element (4) are provided with a cover layer (5).

Claim 6 (Currently Amended): An illuminable information unit according to ~~one of the claims 4 or 5~~ claim 4, ~~characterised in that~~ wherein the cover layer (5) has a bright colour.

Claim 7 (Currently Amended): An illuminable information unit according to ~~one of the claims 4 or 5~~ claim 4, ~~characterised in that~~ wherein the cover layer (5) has a dark colour.

Claim 8 (Currently Amended): An illuminable information unit according to ~~one of the preceding claims~~ claim 1, ~~characterised in that~~ wherein the light-scattering plastic element (4) is integrated into an operating element (15).

Claim 9 (Currently Amended): An illuminable information unit

according to ~~one of the preceding claims~~ claim 1, characterised in that wherein the light-scattering plastic element (4) is designed as an operating element (15).

Claim 10 (Currently Amended): An illuminable information unit according to ~~one of the preceding claims~~ claim 1, characterised in that wherein the information unit is designed as a combination instrument and/or display within the combination instrument.

Claim 11 (Currently Amended): An illuminable information unit according to ~~one of the preceding claims~~ claim 1, characterised in that wherein the light-scattering plastic element (4) is designed as a single- or multi-dimensional light distributor (20) within the information unit.

Claim 12 (Currently Amended): An illuminable information unit according to ~~one of the preceding claims~~ claim 1, characterised in that wherein it is designed as a cover having a three-dimensional surface structure.

Claim 13 (Currently Amended): An illuminable information unit according to ~~one of the preceding claims~~ claim 1, characterised in that wherein it is designed as a warning light,

in particular for an opened vehicle door, wherein preferably the operating comfort is increased.
